

Hi, my name is Donna from Mission Viejo California. My dog, Cami, is a 7-month-old Mini Goldendoodle. I reached out to Yvette, the owner of Mutt Mama Dog Training, for help with several behavioral challenges. Cami is a sweet and playful pup, but she was very excitable nipping at people out of excitement (not aggression), jumping on anyone who tried to pet her, and pulling hard on the leash during walks. We also had some occasional potty accidents in the house.

Yvette helped me address all of these concerns with patience and practical strategies. She recommended a better collar for leash control and taught me techniques to help Cami focus on me, especially when she became reactive or overstimulated around other dogs. We worked on calming exercises, self-control, and how to manage her excitement more effectively. Yvette also introduced boundary training, which was a game-changer. Now I can keep Cami under control when entering or exiting the house—or even the car—where she used to bolt through open doors without hesitation.

Thanks to Yvette's support, I'm learning to be the pack leader Cami needs, and we're both enjoying a calmer, happier life together. I'm so grateful to have found Mutt Mama. Cami and I both thank you, Yvette!
